## DETAILED ACTION

### *Claim Rejections - 35 USC § 112*

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 1-11 and 13 are rejected under 35 U.S.C. 112, first paragraph, because the specification, while being enabling for esterification of sodium salts of some specific D-glucaramides, does not reasonably provide enablement for esterification of any amidoamono acid as the step a to obtain the claimed polymer. In view of the open language of the claimed method, it would require undue experimentation to determine which amidoamonoacids can be modified in intermediate steps to obtain the claimed polymer and for which acids the claimed process will result in the claimed polymers. The specification does not enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make the invention commensurate in scope with these claims.

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 2, 6, 13, 16, 19 and 22 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Art Unit: 1711

Claim 2 recites alcohols "containing a strong acid", which is confusing as to its scope and meaning.

Claim 6 recites "said solvent", however it is not clear whether it refers to the solvent of step b or step c of the base claim.

Claim 13 recited the method of claim 8, but the base claim 8 recites a product, not a method.

Claims 16, 19 and 22 all recite a low molecular weight compound as the formula of a polymer. The recitation of the low molecular weight compound contradicts either the conventional meaning of "polymer" or the recited molecular weights.

***Allowable Subject Matter***

Claims 16, 19 and 22 are would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action.

The prior art of record does not disclose the claimed poly(alkylene D-glucaramide) postpolymers of high molecular weight that can be only obtained via the postpolymerization step (c) as claimed.
